MONOTUBE MAST ARM POLE DETAIL

NOTES:

1. All conduits used for telephone, ground, spare, and service wires shall be installed in the pole hole and terminated in the pole base. Conduit provisions shall be made for each pole base wire. Conduit shall be extended to the pole base and capped at both ends.

2. All conduit shall be installed 6 inches above the concrete pole base.

3. For pole depth less than 60 inches, see Section 723.03.02 of the Kentucky Standard Specifications for Road and Bridge Construction, 4th Edition.

4. Underground service wires shall be installed on the exterior of the pole in a 1" Schedule 80 PVC conduit with a maximum of 6 inches above the base of the concrete pole base.
